SKILLS

- Programming: Java, Python, C++, Delphi, Assembly, Bash
- Web: HTML, CSS, JavaScript, GitHub Pages, DOM Manipulation
- Data Structures and Algorithms
- Calculus and Linear Algebra
- Git and version control
- Debugging and testing
- Problem solving and analytical thinking
- Adaptability and self-discipline
- Communication and teamwork
- High learning velocity

AFFILIATIONS

- Golden Key International Honour Society
- UKZN Hindu Students Association
- UKZN Tech Society

ABOUT ME

Final-year Computer Science student with a strong background in mathematics and a clear interest in artificial intelligence. Proficient in Java, Python and C++, with experience in HTML, CSS and JavaScript. Recognised for academic excellence through multiple distinctions and a Dean's Commendation. Actively tutors high-school and first-year university students, building strong communication and leadership skills. Seeking internship and postgraduate opportunities to apply technical knowledge to real-world AI-driven solutions.

EDUCATION

University of KwaZulu-Natal	2024 – Present
<i>BSc Computer Science and Information Technology</i>	
• Dean's Commendation for academic excellence • South African Mathematics Olympiad (SATMO) • Strong foundation in programming and advanced mathematics	
AdMaths South Africa	2021 – 2023
• Obtained 91% in AdMaths internal exam 2023 • Obtained 61% in AdMaths IEB exam 2023	
Kharwastan Secondary School	2019 – 2023
• South African Mathematics Olympiad (Rounds 1 & 2) participant • IT Award recipient; Deputy Representative Class Leader • Bachelor's Pass with 5 distinctions in the NSC examination	
Willow Park Primary School	2017 – 2018
• Academic competitions, leadership roles, and active participation in school sports and events	
Westville Hindu Primary School	2009 – 2017
• School Prefect and Top 3 Academic Performer; active in cultural, leadership and sporting activities	

EXPERIENCE

COMP100 Tutor	<i>University of KwaZulu-Natal</i>	Feb 2026 – Present
• Provide academic support to first-year students in Python programming and core computer science fundamentals • Facilitate understanding of program design, problem-solving strategies, debugging techniques and algorithmic thinking • Help students build confidence in writing clear, structured and efficient Python code		
Maths and IT Tutor	<i>Independent</i>	2024 – Present
• Tutored high school learners in Mathematics and Information Technology, improving conceptual understanding and problem-solving skills • Explained complex concepts clearly and adapted teaching methods to suit different learning styles • Developed strong communication, leadership and interpersonal skills through one-on-one and group sessions		

PROJECTS

MzansiBuilds	<i>Derivco Code Skills Quest 2026 · HTML, CSS, JavaScript</i>
• Built a platform for South African developers to build in public, track project progress with milestones, and celebrate shipping • Implemented user authentication, a live project feed, comments and collaboration requests	
Valdivian	<i>Final Year Project · C++, STL, Multithreading</i>
• Built a real-time inventory and order processing system simulating multiple customers placing orders concurrently, in collaboration with fellow students	
Fake News Detection	<i>Final Year Project · Python, NLP, Machine Learning</i>
• Built an NLP pipeline to detect fake news using ML classifiers — text preprocessing, TF-IDF feature extraction, model training and evaluation	
CafConnect	<i>University Hackathon · Team Project</i>
• Collaborated in a hackathon team to design and prototype a food-ordering app for the university cafeteria	
Personal Portfolio & Java Applications	<i>HTML/CSS/JS, Java Swing</i>
• Deployed a portfolio site via GitHub Pages, plus Java apps (Password Generator, Typing Speed Test, Calculator) built with OOP
